MARIO KART LIVE HOME CIRCUIT™

Ready, set-up, go!

- Your home is the circuit.
- Create your own real world courses. The only limit is your imagination!
- See the action come to life on your screen!

Drive a kart in the real world using Mario Kart controls!

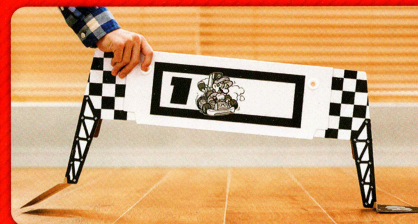

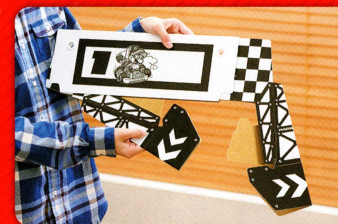

Control your kart while watching the live video feed from the on-board camera!

Opponents and items will appear on the screen. Things that happen in-game affect how your kart moves in real life!

Your Home is the Circuit!

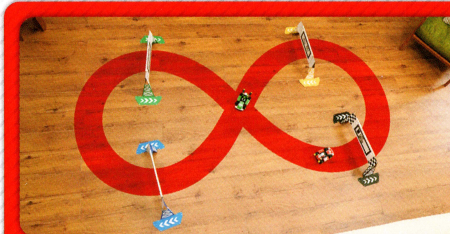

1.

Set up the gates and place them on the floor

2.

Make a course in any shape you please – all it has to do is pass under the four gates!

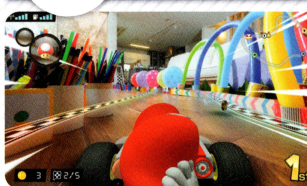

3.

Race against the Koopalings in eight Grand Prix cups.

If you use a Mushroom...

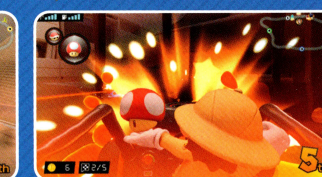

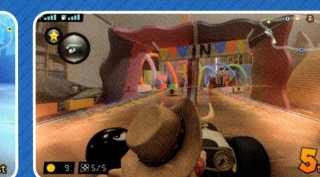

...your kart will dash!

If you're bitten by a Piranha Plant...

...your kart will stop!

Explore your home like never before! Watch as it's transformed into ocean depths, a sandy desert and more in the world of Mario Kart!

Up to 4 players can race together.

Each player needs: 1 kart, 1 console, 1 copy of the software.
